Jeffrey Rengifo

Software and Elastic Stack engineer

jeffrey.rengifom@gmail.com | Medellín, Colombia | Portfolio: jeffrm.com | LinkedIn: jeffrey-rerin | GitHub: Delacrobix

I work on search, observability and AI agents. I write technical articles for Elastic's official blogs and work on Elasticsearch projects for clients.

Skills

AI agents and LLM applications: RAG, MCP, LangChain, LangGraph and LLM evaluation.

Search and observability with Elastic: Elasticsearch, ES|QL, Elastic Observability, OpenTelemetry and search migrations.

Development: Python, FastAPI and TypeScript, with React for interfaces.

Experience

Elastic Stack engineer and technical writer, Kibernum, Elite Consulting Team. Contractor — Sep 2024 to present

- 61 technical articles with code on Elastic's official blogs: 40 on Search Labs since January 2025 and 21 on Observability Labs since April 2026.
- 8 video tutorials on Elasticsearch and LLM applications.
- Elasticsearch consulting projects for US clients.

Freelance web developer, Several clients — 2022 to 2024

Web applications, Chrome extensions, desktop applications, scraping systems, APIs and solutions with Elasticsearch and Kibana.

Projects

Reference and SEO articles, Elastic — Oct 2026 to present

“What is...?” articles and rewrites of pages on Elastic's site about observability, vector search and AI, written from SEO briefs and reviewed with their editorial team.

App Search to Elasticsearch 9 migration, US health research center — Jun 2026 to present

Elasticsearch 9 cluster set up from scratch, with Open Web Crawler. Ingest pipelines that reproduce the previous system's output. TypeScript proxy with Search UI, lifecycle policies (ILM) and search analytics on OpenTelemetry.

Painless documentation rewrite, Elastic — 2025

Took part in rewriting the documentation for Painless, Elasticsearch's scripting language: tutorials, syntax and troubleshooting pages.

Swiftype to Elasticsearch migration, US insurance brokerage — Nov 2024

Migration advisory, with prototypes of a .NET proxy, Search UI and connector mappings.

Vatio (own product). Energy web app for Colombian households. FastAPI and React, with automated tests on every deploy.

Dark Score (own product). Converts sheet music to dark mode in the browser, without uploading files. darkscore.app

FacturAI (own product). App that extracts the data from invoices and bank transfer receipts in photos or PDFs, using OCR and a LangGraph flow. FastAPI and React. Not yet released.

Publications

+52,000 views on elastic.co. No. 1 by articles published on Search Labs.

Certifications

Elastic Certified Observability Engineer. Elastic. February 2026, valid until February 2028.

Elastic Certified Engineer. Elastic. January 2025, valid until January 2027.

Awards

Second place, Enterprise AI Hackathon (RAGenda). New York Stock Exchange (NYSE) and Cohere. March 2024.

Third place, Gemini AI Hackathon (ContentCompass). lablab.ai. January 2024.

Education and languages

Systems Engineering, University of Antioquia (in progress).

Languages: Spanish (native), English (B2).
